- Automation Testing
- Python
- Django
- Java
- Selenium
- Playwright
- Agentic AI
- Github Copilot
- Gitlab Duo

Work Experience

Software Analyst, Capgemini, Pune

September 2024 - Present

Tosca → Manual Test Case Migration Agent

GenAI | Django | APIs | Test Automation

• Developed an LLM-powered system to convert Tosca scripts into structured manual test cases, achieving **98–100% accuracy and ~80% time savings**.

• Built scalable REST APIs, batch processing pipelines, and Streamlit interface for automated test case generation.

• Standardized templates and validation mechanisms to ensure consistency and high-quality output.

NATWEST (Wealth Client), Capgemini

July 2025 - December 2025

Tosca → Test Case Migration (IDE Integrated)

Prompt Engineering | Python | GitLab Duo | Tosca

• Engineered an IDE-integrated GenAI solution to transform Tosca scripts into functional test cases with **~90–100% accuracy**.

• Leveraged prompt engineering and reusable templates to generate detailed step-wise documentation.

• Reduced manual documentation effort by **~25%**.

UiPath Script Review Automation

Prompt Engineering | Python | GitLab Duo | UI Path

• Built an AI-powered validation engine combining rule-based and prompt-driven analysis to review UI Path scripts.

• Automated compliance checks with pass/fail reporting and remediation insights, improving script quality.

• Reduced manual review effort by **~52%** with **70–80% validation accuracy**.

Education

Bachelor of Technology, Pimpri Chinchwad College of Engineering, Pune (7.43)

August 2020 - March 2024
